INTRODUCTION

While, like every other nation in the western world the UK has had regular flows of immigration for centuries now. What is different today and caused this crisis in Ulster, is the sheer volume of immigrants coming from Muslim majority countries.

Who are arriving in the province without the consent of the local people.

The forcing of so many foreign nationals into communities has created an environment of fear among the elderly and resentment among the young.

The elderly feel fearful not only because they are watching the community that they have lived in for a generation, become fragmented and devoid of any community cohesion or neighborliness. They are fearful also because they can see what has taken place in recent years, throughout the West with terror attacks on innocent people by immigrants coming from these Muslim majority countries. They fear for their children and grandchildren and the society they will have to grow up in.

The young are resentful because, they resent not having the same opportunities that their Parents or Grandparents had.

They are resentful because they struggle to find an affordable home, when they come of age.

(The lack of social housing in Unionist communities for local people has become much worse because of this uncontrolled immigration.

It has been one of the major issues of contention in recent years. With no clear signs of any improvement, this is only set to get worse.) They resent the fact that they can't get their children into the local school, because there are no places left. The places that were normally available, are now given to immigrants.

They are resentful that they have to wait far too long to see a doctor or get the treatment that they so desperately need.

They resent the fact, that they feel like second class citizens, in their own country. Where the foreigner is always given priority, or at least it appears that way.

They resent the fact that all of this, is through no fault of their own. The current crisis, is instead the result of the failed immigration policies, by successive Westminster Governments.

This sentiment of fear and resentment that fills the social environment throughout Unionist communities in Ulster today, can be best described through the verses of a poem that I came across some years ago.

By T.A. Dunlop, the verses tell the story of one of our brave young men who fell in 1916 at the battle of the Somme. The poem has it that our boy comes back from the grave a hundred years later and what he sees.

For copyright purposes I can only include four verses of the poem that is called "Flanders Fields". I do believe however that these four verses give us a clear description of the sentiment among many in Ulster today.

They are as follows.....

“One hundred years on our lad has returned,
to view the rewards of his dying.
what does he see as he rises again,
from the ground where his comrades are lying.

A Mosque where his father had brought up his sons!
A Temple where he used to play!
The Bible, the book that has made Britain Great,
now cast, coldly away!

New Laws and new customs and new people too,
The Dervish, the Turk and every pagan.
What did I die for if this is the way,
My country admits each new Dagan!

“Did I die for this” Cries the lad in dismay,
our heritage now but a fable.
Did I risk shot and shell and trench warfare hell,
to make way for a modern-day Babel.”

(Dagan was the god of the Philistines and Babel was the symbol of
One world, Globalism)

With this sentiment brewing in Ulster, it is the purpose of this
publication to explore the matter and call out, “This uncontrolled
immigration crisis” for what it is.

A clear and present danger to our way of life.

PART ONE

Wars, Revolutions and Mass Migration.

The Background to The Current Crisis.

Few who are old enough to remember, can forget the events of the morning of 11th September 2001. When fourteen Islamic Terrorists in a coordinated attack, hijacked four commercial airliners, crashing two of them into the World Trade Centre in Lower Manhattan, New York. A third plane then crashed into the Pentagon and the fourth being brought down in a field in Pennsylvania, by brave passengers, who overpowered the hijackers.

These events that occurred on the 11th September 2001 are indelibly etched into the memory of the majority of the generation that witnessed them. The world was in shock as images flashed across their

Twin Towers 9/11

T.V screens of two airplanes deliberately flying into the Twin Towers of the World Trade Centre.

This attack of militant Muslim fanatics was not however to be an isolated event, but the beginning of another bloody chapter in the war by Islamic Terror against Western Civilization. While these attacks were carried out by a group called “al Qaeda” and led by Osama bin Laden. They were celebrated by Muslims all over the world including here in the U.K.

As a result of these attacks the twenty first century was ushered in with the Leader of the free world, George Bush, declaring war on terror. A war that he said “could last a hundred years”. This Islamic terror that killed thousands on 9/11, began away back in the seventh century in Arabia.

Today it can be seen on every continent, with no country escaping its devilish deeds of murder and mayhem.

In this environment of uncontrolled immigration, it's only a matter of time before this Islamic terror, comes here to Ulster. The words of Winston Churchill from 1899

come to mind, when he said the following: -

“How dreadful are the curses which Islam lays on many people. The influence that it has, paralyses the social development of those who follow it..... It has already spread throughout Central Africa raising fearless warriors at every step.... Were it not for Christianity, the civilization of Europe might fall”.

Islamic Fighter

Winston Churchill

Today in 2024, we are watching that fall. The fall of a civilization, through mass and uncontrolled immigration.

After 9/11, America planed for a land invasion of Afghanistan, to root out al-Qaeda. This was the beginning of a series of wars against Muslim majority nations in the Middle East and Africa. These wars brought mayhem not only to the countries in question, but the whole region. It stirred up old and bitter differences between fractions within countries and turned populations against their leaders. For siding with and helping, what they called, the Christian West.

Islamic Beheading

This turmoil was to cause millions of the citizens of these Islamic nations to flee to the so called, Christian West for a better life.

So, in short, we have people who hate us and yet want to come and live among us. People who burn our flag and shout death to our nation, want to come and live among us.

Now that should concern all of us and yet when they arrive

Immigrants boat crossing

the government wave on in. They even pay their hotel bills. As a result of the West's wars in Afghanistan, Iraq, Libya and Syria, the whole Islamic world was in turmoil. There was great discontentment among the populations of Muslim majority nations, for the fact that their governments were not doing more to help their fellow Muslims. Who were being attacked by what they called "The Christian West". To them, it was and still is "A Holy War", that started on 9/11.

Islamic Jihadi Fighter Group

This discontentment was to get much worse, due to the dire living standards, of so many Muslims, after the credit crunch of 2008.

For in 2011, in Tunisia a young street vendor set himself on fire as a protest against the corruption of the government and the poor standards that he and his people were condemned to live in.

This lit the fuse, of what was to become known as "The Arab Spring". It spread across North Africa to Egypt and from there into the Middle East. When it reached Syria, it was to develop into a civil war, that was to last over a decade and claim hundreds of thousands of lives. Millions more were to become displaced and travel to Europe.

The Arab Spring was another Islamic Revolution, to overthrow any liberal leadership that didn't apply the strictest form of Islamic Law. The unrest led to one the largest mass migrations of people, since the second world war.

From 2011 there has been a constant flow of millions of Muslim

immigrants into Europe. Most of these immigrants are fighting age men, coming from war torn countries, that hate Western Civilization, showing particular hatred towards the Christian faith. This should alarm us.

In 2014 we witnessed on our T.V screens tens of thousands of Muslim immigrants walking through Europe. With many of them being stopped at national borders along the way.

Immigrants crossing to Europe

Police Border

We seen armies being mobilized and barbwire fences going up again for the first time in decades. It soon became clear that Europe was in the grip of an immigration crisis, that it could not control and was only set to get worse.

It is worth keeping in mind, what the founder of the Muslim Brotherhood, Shaikh Hassan Al-Banna said when describing the nature of Islam. His comments were quite telling, when he said the following: -

“It is the nature of Islam to dominate, not to be dominated, to impose its law on all nations and to extend its power to the entire planet”

This coupled with the speech made by the Ayatollah Khomeini, after the Islamic Revolution in Iran in 1979. When he stated the following: -

“We shall export our Revolution to the whole world. Until the cry Allah Akbar resounds over the

whole world. There will be struggle, there will be Jihad, Islam is a religion of militant individuals.... Islam will be victorious in all the countries of the world. The teachings of the Quran will prevail all over the world.... This is the duty that all Muslims must fulfill”.

Protestors expressing Islams intent

When you take these two statements and put them into the current context of mass and uncontrolled immigration from Muslim majority countries. We have every legitimate right to be concerned.

Migration used as a weapon of war

The weaponization of immigrants and refugees during a time of war, is not a new thing. It is as old as war itself. The displacement of populations was used during both the first and second world war to great effect. It has long since been established that the pushing of large numbers of people into neighboring countries to destabilize them and prepare them for invasion is both cheap and effective.

This is proven to be even more effective when the country they are being pushed into, is of a different faith and culture to those who are being displaced. Old wounds are

Poland Border

opened and resentment between the two fractions grows. Apart from the economic reasons, it causes national governments to be distracted from the war effort.

It is difficult at the best of times to raise an army for war. This is only compounded when the people are discontented with their government over their leadership and at odds with the ever-increasing number of immigrants, over Faith, Culture and their claims of entitlement.

In short it is much harder to raise an army in an environment of mistrust and division. Now it is hardly surprising that our enemies know this.

In fact, it is for this very purpose, that both Russia and China have been funding and fermenting wars, strife and civil unrest in countries on every continent for over a decade now. They have been softening up the West through mass immigration in preparation for the next world war. That gets closer every day.

When we consider that after ten years of the Russian Mercenary group Wagner operating in Africa. The whole continent is now, more or less in flames. Just about every country has gone through or is still going through turmoil.

Fighter Group

Everywhere Wagner have been, people have witnessed an ogre of murder and mayhem, lifting crime and corruption rates to all-time highs. The French have even had to pull their troops out of nations, who they have had a long historical ties with.

With so many countries now in crisis. Some even on the brink of lawlessness. This chaos that is being caused by Wagner is deliberately adding to the mass exodus of people from these failed states.

This coupled with China's debt trap otherwise known as "The Belt and Road initiative". Which has left some nations in Africa unable to meet their population's basic needs. Most of their GDP now goes to repaying China. For roads, bridges and railways that they didn't need, but are stuck with, and will spend the next hundred years paying for. This will cause even greater resentment against China. Who are already experiencing some hostility from the locals around some of their newly required sites in Africa.

The uncertainty and chaos that is engulfing Africa will inevitably lead to tens of millions more immigrants arriving in Europe. This is part of Russia, China's and Iran's Geo-Political strategy, divide and conquer. For a very clear and recent example of this just look at what took place on the Polish border with Belarus in 2021. Russia flew thousands of immigrants from Syria to Belarus to destabilize Poland, but it failed because Poland refused to accept them and had their military push them back into Belarus. In order for Poland to do this, they had to ignore international pressure.

Something that many of us here in U.K would like our own government to start doing. Focusing on the National interest and ignoring international pressure.

PART TWO

Islam and the slow burning fuse, of the immigration (Invasion) Bomb

In order for us to understand the historical timeline of this current wave of mass immigration from Islamic countries.

We have to take into consideration that, just about all of the Arab states rejected fundamentalist Islam after the defeat of the Ottoman Empire towards the end of the first world war. By the end of 1917, the Ottoman Empire along with its fundamentalist view on Islam, was slowly being rejected by the newly formed Arab states, in the Middle East.

These newly formed states embraced instead a more socialist doctrine. Which led to the secularization of the Middle East.

This continued until after the second world war, at least until 1948. From the end of 1946 plans were being made to bring the Jews that had been displaced during the war, from Europe to Palestine.

The original purpose was to give them a Homeland alongside the Palestinians. However, this did not work out as planned. By the spring of 1948 the Jews, who were led by a very militant leadership, felt themselves strong enough, to Declare their independence.

On the 14th May that year, David Ben-Gurion raised the Star of David and Declared the Establishment of, “The Jewish State of Israel” that would come into being at the end of the British Mandate, that was

to expire at Midnight that Day.

After this the Jews pushed approximately half a million Palestinians out of their homes and off their ancestral land. This was called “The Catastrophe”, and led to a series of wars between Israel and its Arab neighbours.

The first was later in that year 1948, the second 1967 and the third in 1973. The resentment against the newly formed state of Israel, by its Arab neighbours, reached fever pitch. This drove the resurgence of fundamental Islamic teaching throughout the region. There was more and more talk of Jihad, particularly among the Muslim youth.

By 1978 Islam had become much more militant. The 1970s also seen the introduction of the “Petro-dollar”. This was to become crucial to the funding of Islamic Militant groups, that sprang up all over the region. This funding came from oil rich Arab nations, mostly from the Gulf.

This militant spirit was to manifest itself very clearly in the success of the Islamic Revolution in Iran, in 1979. In fact, this current phase of Islamic Terror can be traced back to there.

Ayatollah Khomeini

The coming to power of the Ayatollah Khomeini was a step change in Militant Islam. They had entered what many Muslims call “The Golden Age”.

The Golden Age that they refer to is a period of time, that according to them, would see Islam rise to the dominant religion in the world. Therefore, making all other religions, including Christianity inferior to Islam.

This they aim to do, not by consent, but by conquest. By a wave of global terror that will bring the West to its knees. The season of global Jihad had come.

Islam is the fastest growing religion in the world today. One in every six people on the planet professes to be a Muslim. Islam can be found on the rise everywhere. From the jungles in the south of the Philippines, to the seats of power in London, Washington and New York.

In just about every nation Militant Islam is on the march. From 2011 they have launched deadly attacks in no less than twenty-three countries. As I have stated, I believe that it's only a matter of time before one is carried out here in Ulster. By some of these Militants, who will be hiding among the immigrants coming in.

The fact of the matter is that there are hundreds of millions of Muslims all over the world that believe that Jihad is the only way that Islam can fulfil its destiny of world domination.

The teaching of Islamic fundamentalism is very clear. They are engaged in what they call a "Holy War" against all unbelievers. They also believe that it is the duty of all Muslims everywhere to be involved in it. This is confirmed by the Islamic Scholar Sayyad Muhammad Qutb, when he said, "Every one of the believers must fight this war". They believe that there is a current Islamic revival underway and this

will lead to a global revolution. They are preparing for this, by placing their warriors in countries all over the West. These Islamic Militants are being placed in Western countries under the cover of this mass immigration. One day, the call will come and they will rise up and fulfil their Devilish duty.

We have welcomed the wolf to our bower and soon we will pay the price.

Protestors showing the intent of Islam

PART THREE

The clear and present Danger facing Ulster Today

Taking into consideration how Militant Islam has flexed its muscle on the world stage after the revolution in Iran, you can see how real these warnings given at the time actually were.

The problem is, there appears to be a widespread apathy to the fact that Militant Islam is very much at work in many countries, planning attacks. The question is are they at work, planning them here, in Ulster. If we wait until they carry one out, then it will be too late.

Islamic Fighter Group

With each new wave of immigrants, comes the religious fanaticism, which has engulfed the Middle East and left parts of Africa in flames. I fear that it will not be long before Europe goes the same way.

Angela Merkel

On the 31st August 2015 the then Chancellor of Germany, Angela Merkel stated that Germany would accept, 1 million immigrants, who came from the refugee camps, that were on the Syrian border with Turkey.

At the time, she used the phrase “We can do it”. In an attempt to reassure the German people and convince them to come along with her, on this crazy journey to national ruin.

This statement was like throwing petrol on an immigration fire. It caused mayhem and sent shock waves through the whole E.U, with countries in Eastern Europe refusing to let the immigrants pass their borders. This left hordes of immigrants, numbering in their tens of thousands, in some cases, at national borders facing border guards and soldiers.

The decision to open Europe’s doors and let so many Muslim immigrants in, drew criticism from many, including Donald Trump. In 2016 while campaigning to be president of the United States, he not only said that it was stupid, but even quoted the poem “The Snake”. While Trump suffered tremendous abuse from sections of the media for making these comments. Time has proven him right.

As a result of this mass immigration that Europe has witnessed in the last decade. The European Union, now struggles to keep these immigrants out. They are striking deals with Muslim countries all over Africa and the Middle East, for those nations to stop them coming. Like the U.K, the E.U are spending an ever-increasing number of billions every year on an immigration problem of their own making. Apart from the economic cost to the immigration crisis that grips the whole of these Isles. There are many other areas, where we have all had to pay the price, not least, security.

We have all witnessed these so called “spectacular” Terror attacks. As images of them happening in real time are flashed across our T.V screens. There are few countries in Europe who haven’t experienced

a threat from Militant Islam.

The western countries of Europe have seen more Militant Islamic attacks in recent years than some others. The reason for this, is very simple. They have far more Muslim immigrants than the others. So, the more Muslim immigrants, the more likely hood that some are militants, coming to do us harm.

Immigrants Boat Crossing

In the nine years since Angela Merkel made that statement “We can do it”. Germany has been in a state of Political, Economic, Moral and Social decay.

Politically they have created the space for the rise of the far right, for the first time since the 1940s. Their economy is sluggish and the immigration project is now costing them 30 billion Euro, a year.

The crime rate has risen sharply in recent years, with the sexual offences being reported in Germany, now at new highs. The prisons are full and the police are having to work all the hours there is, just to keep their streets safe. Mass immigration from Muslim majority countries has had a detrimental impact on German society and communities, leaving many of them changed unrecognisable.

In fact, if ever you needed an example of how NOT to do immigration, you would be hard pressed to find a better example than Germany. On the other hand, and in complete contrast to this, you have Poland. They are also an E.U country, but unlike Germany they have not let

any Muslim immigrants in from Africa or the Middle East. They also have not had any terror attacks from Militant Islam. So, controlling your borders does actually work, in stopping terror attacks.

As for the United Kingdom, under the cover of this uncontrolled immigration, the soft invasion of Islam is well under way. One boat load at a time.

This should be a wake-up call for us all. It should also be of great embarrassment to our political leadership, for their utter failure in NOT “stopping the boats”.

Hamas supporters within the crowd

Raied al Wazzan (left) pictured outside Belfast Islamic Centre

How this all effects us here in Ulster, is very simple. What happens in Brussels, London or Dublin, matters a lot to us, for they control our borders. They are the ones who make

the decisions on who comes here and from where.

In this new political climate after Brexit, where Northern Ireland is at the bottom of the food chain. We will get the immigrants that nobody else wants. In short Northern Ireland has become a dumping

ground for Islamic immigrants. When they come here, we are stuck with them. Simply because we lack any political leadership with the moral courage to say NO.

The fact that we have no control whatsoever over any of these immigrants who come to Ulster. We have No control of the numbers or from what Islamic country they come. If Government even know. For the immigrants get rid of any personal identification before they arrive. So, we don't know who they actually are. Nor do we have any real idea, as to what their intentions are toward us, when they get here.

Yet we are told by are political masters, that none of this matters and we just have to suck it up and take them all in. They even make laws to stop anybody questioning it. So, you don't get jailed for coming here illegally, but you can get jailed if you question or oppose it.

Is it any wonder so many of them are coming?

This uncontrolled immigration is a clear and present danger to the very way of life of the Northern Irish people. The threat of a Terror attack from Islamic Militants becomes all the more real with every wave of these Muslim immigrants. That are being relocated here, in Ulster. They present a clear danger to our security, for the more Muslim immigrants come in. The more likely hood, that there will be Militants hiding among them. With the secret intent of one day, doing us harm.

This influx of immigrants is also a danger to our economy. Apart for what the British Government spend on immigration as a whole. The separate bill for Northern Ireland for the year 22/23 was some £7 million. When you take into consideration the impact on our

Health Service, Education, Justice System and Housing. The cost will be a lot higher. This money could and should be spent to improve the lives of the Northern Irish people.

The mass immigration that we have witnessed in recent years, presents a danger to our Society in general. It has changed communities up and down the land. There are areas in Belfast that have become so overwhelmed with these immigrants that they are barely recognisable as part of Belfast today. The communities that once thrived, are becoming more like slums in a third world country. When their numbers build up, they then start to change things. A classic example of this, is how England has changed, through mass immigration from Islamic countries. The list that was published late last year speaks for itself..... It is as follows: -

Mayor of London	Muslim
Mayor of Birmingham	Muslim
Mayor of Leeds	Muslim
Mayor of Blackburn	Muslim
Mayor of Sheffield	Muslim
Mayor of Oxford	Muslim
Mayor of Luton	Muslim
Mayor of Oldham.....	Muslim
Mayor of Rochdale.....	Muslim

Now the fact that they achieved this with only 3 million Muslims out of a population of 66 million in England shows how organised Islam is in the U.K. Think what they would do here, in Ulster, if they had the numbers. They would change the whole cultural environment of Northern Ireland forever. That's why this uncontrolled immigration is a danger to our way of life.

There is today at least 3,000 Mosques in England, more than 130 Sharia courts and some 50 Muslim councils. With every school in England now required to teach lessons on Islam, without being critical.

Remember that this is all largely due to the failed immigration policies of successive Governments, for decades now.

London Central Mosque

While there is widespread ignorance among church leaders and politicians, regarding Islam, in this generation. It wasn't always that way. Here are some quotes from church leaders of the past.

The Bible scholar and great Evangelist Jonathan Edwards, wrote the following concerning Islam: -

“The two great works of the Devil against the Kingdom of Christ are the Anti- Christ system of the Romish Church and the Muslim Islamic Kingdom of Muhammed”, he goes on to say that “Muhammed was Satan's Prophet”.

Martian Luther said: -

“As for Muhammed he is a liar, because he denies that Jesus is the Christ”.

John Wesley, said that: -

“Islam was a disgrace to human nature”.

If Church leaders today were to make such statements, they would

be hounded, by the press and probably brought before the courts. Such are the times that we live in; an age when political correctness has gone mad. Any preacher or politician, who dares to speak out, will find themselves like the Late Pastor James McConnell, in Belfast and brought before the courts.

Pastor James McConnell

As for our former First Minister Peter Robinson, he seemed happy enough with Muslims, as long as he can send them to the shop. If you think that Islam is not going to cause problems in Ulster, remember what happened then, and think again.

Thank God that Pastor McConnell was acquitted, and rightly so, but don't think that means it's all over. As the numbers of the Muslim immigrants grow here in Ulster, expect more challenges to our Protestant Liberty. Expect more pressure on our already stretched services, such as health, housing and education.

Shopping for Peter

As communities become more and more overwhelmed with immigrants from Muslim majority countries. The fear and resentment that already exists here, is only set to grow.

As concerned citizens, we should be making our fears known to our political representatives and asking them to do more to stop this influx of immigrants into their communities.

If we remain asleep to Islam's intentions, of world domination. It may prove to be disastrous. If we leave it too long, it will become too late, and the cultural soul of Ulster will be lost forever.

IN CONCLUSION

The moon god Allah is a fake, a big bright shinny lie. Muhammed was an imposter, the false prophet and liar from the desert. Who rapped himself in his own vain glory. The Quran and the Hadith are a formula for self-destruction.

The Bible should be believed, it is Truth.

When it comes to Salvation the Bible is very clear, that there are but two steps to Salvation:-

STEP ONE:

Step out of yourself..... Let go of everything and anything that you think merits your favour with God, because it doesn't. There is nothing that we can do of ourselves that can earn us Salvation. We must come to God, as we are, Sinners. We must Repent and Believe the Gospel. That Christ Jesus came into the world to save Sinners.

STEP TWO:

Step into Christ..... We must come to God as we are, Sinners and ask for His Mercy. We must Believe and accept that Salvation is a Free Gift from God. We must Believe that, The Lord Jesus Christ, God's only Begotten Son, has achieved our Salvation for us on the cross, when He died for our sins. Step into Christ, accept Him as your Saviour and you will be Saved.

If you are not saved, but would like to be, then you may find this prayer helpful: -

**GOD BE MERCIFUL TO ME A SINNER,
AND FORGIVE ME FOR MY SINS.
I REPENT OF MY SINS,
AND PUT MY TRUST IN THE LORD JESUS CHRIST,
FOR MY SALVATION.
MAKE ME A NEW CREATURE IN HIM,
AND GIVE ME THE POWER TO LIVE FOR HIM,
FROM THIS DAY FORWARD,
IN JESUS NAME, AMEN.**
